PROFESSIONAL SUMMARY

AI Automation Engineer and Backend Developer with 3+ years of experience across freelance, agency, and in-house roles. Builds production-ready backend systems, AI-powered automations, CRM integrations, voice/lead workflows, and business websites using Node.js, Python, FastAPI, OpenAI APIs, and n8n. Focused on reliable, database-backed software for real business use cases.

CORE SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Backend: Node.js, Express, FastAPI, Django, Flask, REST APIs, WebSockets, JWT

Databases: PostgreSQL, MongoDB, MySQL, Firebase, Supabase

AI, ML & Deep Learning: Machine Learning, Deep Learning, Agentic AI, AI Agents, RAG, Prompt Engineering, Vector Databases

AI & Automation: OpenAI API, Claude API, Gemini API, n8n, Zapier, Make, Workflow Automation, CRM Integration, Zoho CRM, Zoho Recruit, Zoho Flow

DevOps & Tools: Git, Docker, Vercel, Render, Railway, Stripe, Razorpay

WORK EXPERIENCE

Software Developer

Mar 2026 - Sept 2026

Right Advisors | Delhi, India

- Built an AI voice-calling agent that automates recruiter outreach—capturing caller intent, qualifying leads, and syncing structured records into Zoho.
- Designed and shipped responsive business websites and internal tools used across the organization.
- Automated multi-step workflows across the Zoho ecosystem (CRM, Recruit, Flow), cutting repetitive manual work for the recruitment and business teams.
- Developed a role-based task-management application (assignment, deadline reminders, EOD reporting) and an in-house HRMS platform covering attendance, payroll, and analytics.

AI Solutions Specialist

Apr 2025 - Feb 2026

Growing Digitally | Remote

- Built and deployed a range of client websites—service-industry, e-commerce, blog, and business sites—from design through launch.
- Developed AI agents and automated workflows to streamline content, lead handling, and repetitive business operations.
- Worked hands-on with leading AI tools and platforms—ChatGPT, Gemini, Perplexity, Claude Code, and connectors—to prototype and ship AI-powered features.

Freelance Software Developer

Jan 2023 - Apr 2025

Self-Employed | Remote

- Delivered 15+ client projects across healthcare, education, recruitment, SaaS, e-commerce, and service businesses.
- Built secure REST APIs, authentication systems, admin dashboards, payment integrations, and database-backed applications with Node.js, FastAPI, PostgreSQL, and MongoDB.
- Integrated Stripe, Razorpay, and WhatsApp/email workflows while managing projects end-to-end from discovery through deployment.

SELECTED PROJECTS

AI Voice Calling & Lead Qualification Agent

OpenAI API | n8n | Webhooks | CRM APIs

Designed an AI-assisted calling workflow that captures caller intent, qualifies leads, structures notes, and pushes follow-up-ready records into CRM pipelines.

CRM & Recruitment Automation System

Zoho CRM | Zoho Recruit | Zoho Flow | REST APIs

Automated candidate and lead movement across Zoho tools, including assignment logic, status updates, follow-up triggers, and internal reporting flows.

E-Commerce Platform

Node.js | MongoDB | Stripe | REST APIs

Built the backend for a production-style storefront with authentication, cart and checkout APIs, payment integration, admin product APIs, and database-backed order handling.

Real-Time Code Collaboration App

Node.js | MongoDB | WebSockets

Developed the backend for a collaborative editor with live room sessions, real-time WebSocket sync, and shared editing state persistence for multiple users.

EDUCATION & ACHIEVEMENTS

Bachelor of Computer Applications - Currently enrolled

Grade 12 - PCM, CBSE - Modern Vidya Niketan, Faridabad

Delivered 15+ client projects | Finalist, National Junior Coding Championship 2024 | Winner, School Hackathon 2023
